## Languages

English 

German 

## Hobbies

 Playing piano, Singing, Listening and Composing Music

## About Me

In my long electrical engineering education, I always had a propensity for automation and software. Near my graduation, I preferred to switch completely to software and continued from the field of Frontend development. After about 1 year of studies, I decided to lift my head from small projects and make my own website. Calorie-Card. Later in my career, I want to be a developer who can complete his work perfectly in this field. I continue to improve myself and I will always continue to improve because I do not think that there will be an end of it.

## Education

**Bachelor of Electrical-Electronics Engineer**

**Oct 2016 - Jun 2022**

Kırklareli University, Kırklareli

## Certificates

**Programming in HTML5 with JavaScript and CSS3**

**Nov 2022**

**CSS**

**JavaScript**

**React.js**

**Responsive Web Design**

**Vue.js**

**Next.js 14**

I consent to the processing of my personal data for the purpose of recruitment for the position to which I am applying.

# Projects

## Front-end Developer

May 2023 - Aug 2023

Freelance, Kirklareli

### CALORIE-CARD WEBSITE

I designed a website for the project called Calorie-Card, which my friends at school did as a graduation project. I used React.js and SASS. I took care to make it completely responsive. I used various React hooks and added the Route structure. You can click on the github link for project details and the site link to review the site.

- <https://calorie-card.netlify.app>

## Front-end Developer

Aug 2023 - Aug 2023

Freelance, Ankara

### NIKE WEBSITE 2.0

The entrance section of the Nike page was designed on this website. It cannot be said that it is exactly a clone project. We can call it Nike 2.0 website. React.js and tailwind CSS were used. The link and github address of the site are below.

- <https://github.com/tutusjr/Nike-Website>
- <https://nike-website-tutusjr.vercel.app>

## Front-end developer

Sep 2023 - Sep 2023

Freelance, Ankara

### AMAZON CLONE

Amazon clone was made in this project. React.js and Tailwind CSS were mainly used. Various React hooks were applied. You can click on the Github link for details and the site URL to review the site.

- <https://amazon-clone-tutusjr.vercel.app>

## Front-end developer

Sep 2023 - Present

Freelance, Ankara

### TWITTER CLONE

In this project, the twitter clone was made extremely carefully. Font size, text colors and theme changes can be made within the application. React.js and Tailwind CSS were mainly used, various tools such as Redux were also used. The building of the site is still ongoing and it is not finished yet. but it's current state can be examined as I have described it. The site link and github link are below.
